DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35. U.S.C. 121:
 - A. **Claims 1-14, 19-33** recites a method for processing a differential first pulse amplitude modulated (PAM) signal, which falls into class 375, subclass 353.
 - B. **Claims 15-18, 34-37** recites an apparatus for controlling a gain of a digital signal processor, which falls into class 375, subclass 345.
2. The claim groups A and B involve totally different concepts, which would involve a search of at least two different classifications.
3. Because these inventions are distinct for the reason provided above and the search required for Group A is not required for Group B, restriction for examination purposes as indicated is proper.
